Quickly and Safely Find Images on the Internet with Google Advanced Image Search

1. Go to Google.com.

2. Click on **Images** – top left corner.

3. Go to **Advanced Image Search** – next to the Search Images button.

4. When the Advance Image Search window appears, type your search word (keyword) in top line *Find results related to all of the words.*

5. Use *Find results **not** related to all of the words* to limit your search.

6. On the **Usage Rights** line, use the pull-down menu to select *labeled for reuse* to return images that are okay for you to use.

   Remember: Most images on the Internet are owned by someone!

7. On the **Safesearch** line, click on <u>Use strict filtering</u>.

8. Click the **Google Search** button.

9. Select your image by clicking on the image.

10. To save the image, **Control-Click on the image** and select *Save Image As…*

11. To cite the source of your image (to let people know where the image is located) **Control-Click on the image** and select *Copy Image Location.* Now you can paste the image location into a document or presentation.
